„ENTREPRENEURSHIP- KEY TO SUCCESS”

THEME:

FROM HOBBY TO BUSINESS

The Beginning

It all started when I was a child.

- When I was 5 years old my mother bought me a LEGO construction package. I was so happy that I spent all my time playing and building stuff. From then on my mother saw that I loved it so much that she bought me even more and I ended up with my little room full of LEGOs.

Time to get serious

We only get older

- As I got older my passion for building grew on me and I began taking building more seriously. So seriously, in fact, that I created little houses made out of wood for birds and even for my dog.

Dream Big

Make it happen!

- Once I graduated from High School I went straight to an Architecture University to strive for my dream. It was not easy at first, even though I was sure that I could become the best and start a business based on this.

Teamwork

Find a partner

- Once I graduated from University I decided to start a small company. So I needed some help...a partner. It was hard finding one but I didn't give up and eventually it all worked out just fine and I found the best person ever, my actual best friend.

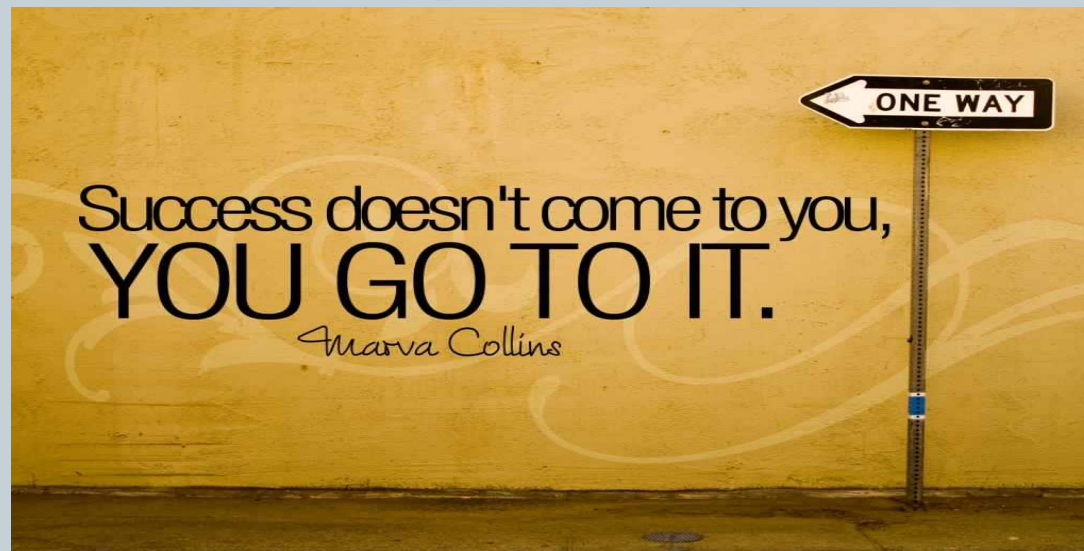

Reach the Top

Whatever it takes

- Together we were unstoppable. We risked a lot and started working more and more. At the beginning, our little company did not have many clients but we still didn't give up and as time went on we started getting more and more customers. However, it wasn't enough. We wanted more. We wanted to be to the top.

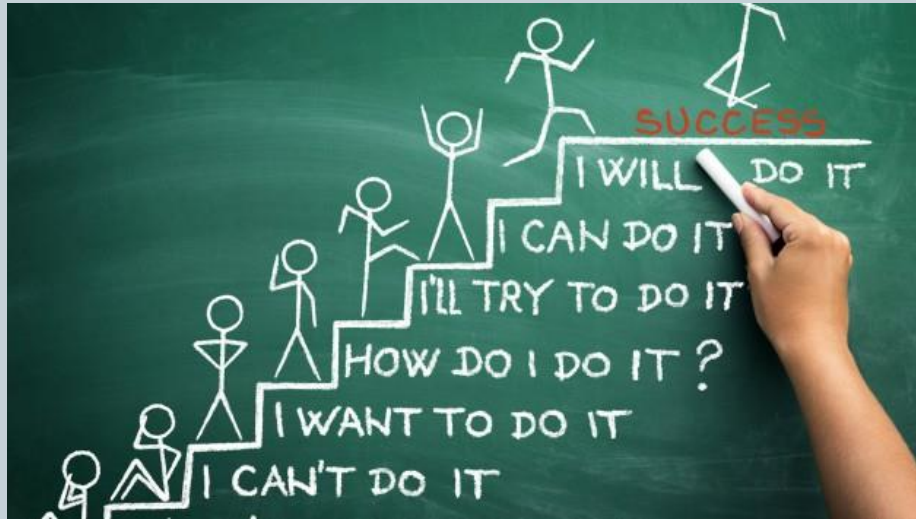

Success

We made it!

- After a long journey we finally made it. We are to the top. With hundreds of employees and a lot of customers, we are one of the best Architecture companies in the world. And, just a small reminder, it all started from a little hobby of mine, building houses from LEGOs.

Made by

Students :

- Dinescu V. Ciprian
- Huzui Constantin
- Dragomir Emilia
- Veveriță Ioana

Teachers:

- Diaconescu Gheorghita
- Samoilă Mioara

Thank you all for your attention 😊.

Exercises!

- You must give a name to your company related to your team word;
- You must identify the domain of activity for your company (mouse, laundry, vegetables, flowers, paintings, books);
- You need to tell us the ways to promote and advertise your company.

GOOD LUCK! ☺☺☺
